This Is Not An Introduction to d3.js

Jennifer Piscionere

@jpiscionere

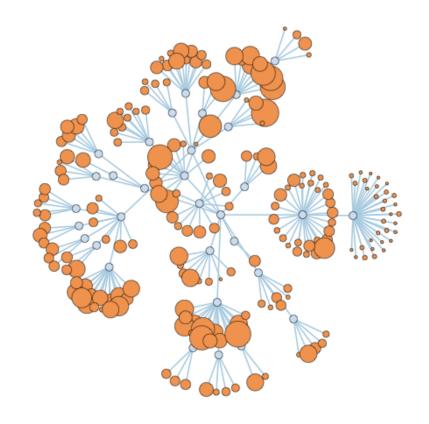

This Is An Introduction to Seeing Something That Looks Cool on the Internet and Ripping it Off

This Is An Introduction to Seeing Something That Looks Cool on the Internet and Ripping it Off

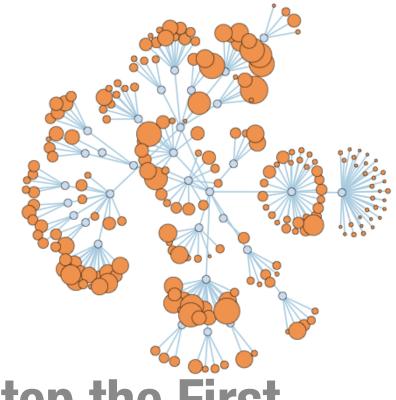

MAKE YOUR OWN CODEFLOWER

http://www.redotheweb.com/CodeFlower/

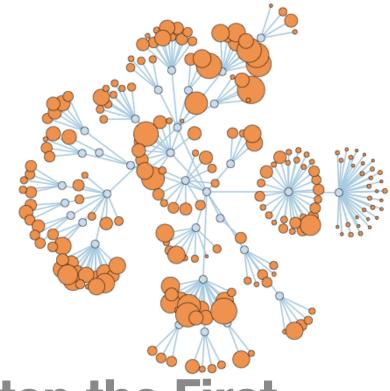

Force Collapsible Example

Step the First

SAVE FORCE COLLAPSIBLE WEBPAGE USING FIREFOX* ON YOUR LOCAL MACHINE

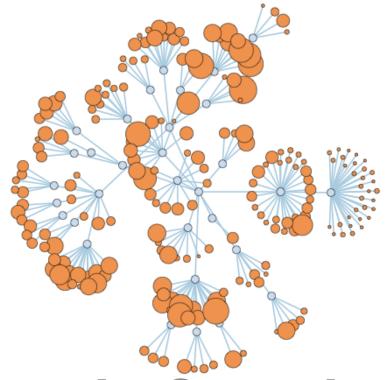

Step the First

SAVE FORCE COLLAPSIBLE WEBPAGE USING FIREFOX* ON YOUR LOCAL MACHINE

*This is non-negotiable for the time being.

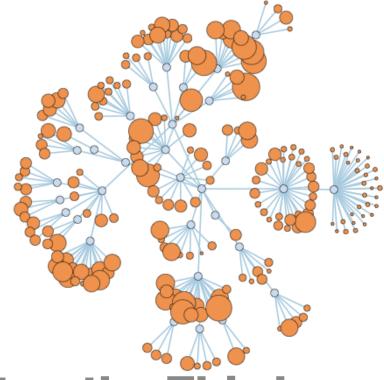

OMG I KNOW chrome/safari/opera/butterfly wings interpreting html IS SO MUCH BETTER

Step the Second

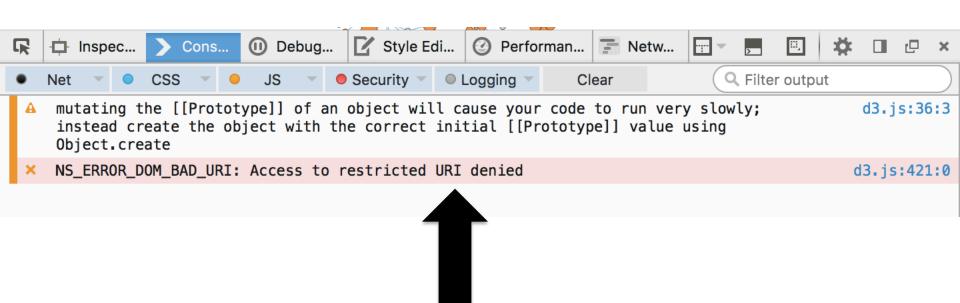

OPEN FORCE-COLLAPSIBLE.HTML USING FIREFOX

Why Doesn't My Flower Work?

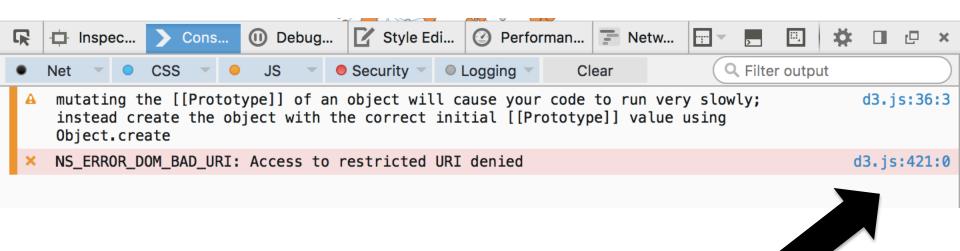

Step the Third

OPEN THE CONSOLE TO SEE THE ERRORS

red == not good

Not helpful

Step the Fourth OPEN FORCE-COLLAPSIBLE.HTML USING THE TEXT EDITOR OF YOUR CHOICE (!!!)

Lines 1:20 HTML / CSS / SVG

12

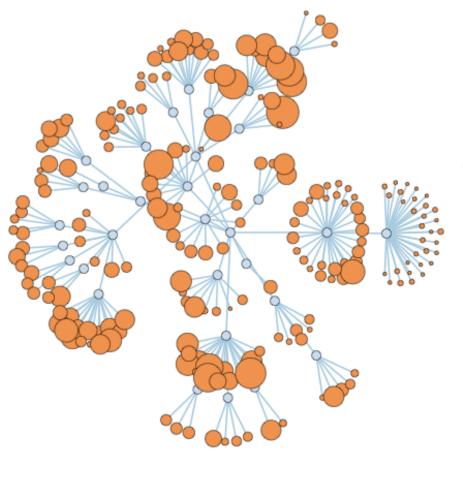

14

15

16

18

```
<!DOCTYPE html>
    <html><head>
        <meta http-equiv="Content-Type" content="text/html; charset=UTF-8">
        <link type="text/css" rel="stylesheet" href="force-collapsible_files/style.css">
        <style type="text/css">
    circle.node {
      cursor: pointer;
      stroke: #000;
      stroke-width: .5px;
11 -
    line.link {
      fill: none;
      stroke: #9ecae1;
      stroke-width: 1.5px;
17 -
        </style>
19 -
      </head>
```

What it Says? HTML How it Looks? CSS

Flare code size force-directed graph

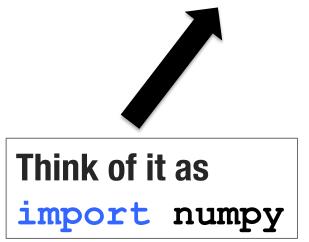

Lines 1:20 HTML / CSS / SVG HEADER

```

Final Project MAKE YOUR OWN CODEFLOWER

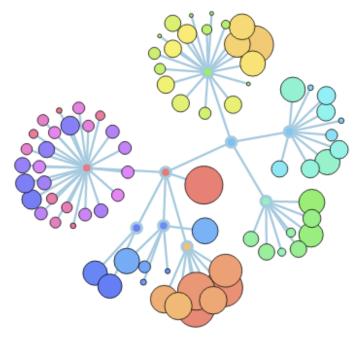

Step the First

GO TO CODEFLOWER WEBSITE

Step the Second UPDATE USING FLARE.JSON

Step the 2nd.5

USING YOUR OWN GITHUB REPO AS THE SOURCE OF DATA

1. Install cloc

```
npm install -g cloc # https://www.npmjs.com/package/cloc sudo apt-get install cloc # Debian, Ubuntu sudo yum install cloc # Red Hat, Fedora sudo pacman -S cloc # Arch sudo pkg install cloc # FreeBSD sudo port install cloc # Mac OS X with MacPorts
```

1. Install cloc

```
npm install -g cloc # https://www.npmjs.com/package/cloc
sudo apt-get install cloc # Debian, Ubuntu
sudo yum install cloc # Red Hat, Fedora
sudo pacman -S cloc # Arch
sudo pkg install cloc # FreeBSD
sudo port install cloc # Mac OS X with MacPorts
```

2. Count the Lines in Your Repo

Your Repo Here

```
# Using curl and cloc (fast, accurate)
$ curl https://nodeload.github.com/symfony/symfony/tar.gz/master | tar xvz
$ cloc symfony-master --csv --by-file --report-file=symfony.cloc
```

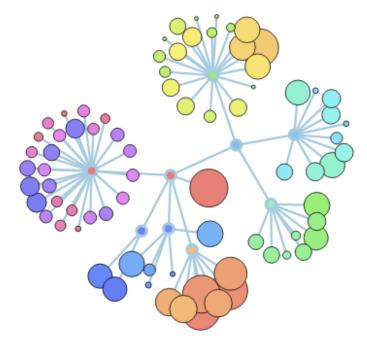

1. Install cloc

```
npm install -g cloc # https://www.npmjs.com/package/cloc
sudo apt-get install cloc # Debian, Ubuntu
sudo yum install cloc # Red Hat, Fedora
sudo pacman -S cloc # Arch
sudo pkg install cloc # FreeBSD
sudo port install cloc # Mac OS X with MacPorts
```

2. Count the Lines in Your Repo

```
# Using curl and cloc (fast, accurate)
$ curl https://nodeload.github.com/symfony/symfony/tar.gz/master | tar xvz
$ cloc symfony-master --csv --by-file --report-file=symfony.cloc
```

3. Put cloc output into .json format use widget on codeflower website

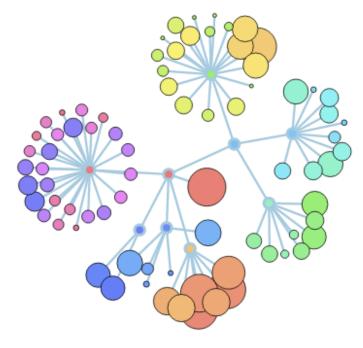

Step the Third

DOWNLOAD CODEFLOWER WEBSITE

```
stroke-width: 1.5px;
36
37 -
     }
38
         </style>
39 -

                                                                                                         teammates about a repository?
             CodeFlowers tries to answer these na
                                                                    es to make code look b
                                                                                                          's another story.
71
             <h2>Usage</h2>
             To create a CodeFlower, include the <code>CodeFlower.js</code> file together with <code>d3.js</code>, just like in this page. Create a new Code
